

# Energy performance certificate (EPC)

9 Morebreddis Cottages Chequers Road Goudhurst CRANBROOK TN17 1DG	Energy rating	Valid until: 31 March 2035
	<b>F</b>	Certificate number: 2544-3048-6207-5435-6200

Property type	Mid-terrace house
Total floor area	86 square metres

## Rules on letting this property

### ! You may not be able to let this property

This property has an energy rating of F. It cannot be let, unless an exemption has been registered. You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Properties can be let if they have an energy rating from A to E. You could make changes to [improve this property's energy rating](#).

## Energy rating and score

This property's energy rating is F. It has the potential to be B.

[See how to improve this property's energy efficiency.](#)

Score	Energy rating	Current	Potential
92+	A		
81-91	B		83 B
69-80	C		
55-68	D		
39-54	E		
21-38	F	30 F	
1-20	G		

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D

- the average energy score is 60

## Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, limited insulation (assumed)	Very poor
Roof	Roof room(s), no insulation (assumed)	Very poor
Window	Single glazed	Very poor
Main heating	Electric storage heaters	Average
Main heating control	Manual charge control	Poor
Hot water	Electric immersion, off-peak	Average
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	Room heaters, wood logs	N/A

### Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO<sub>2</sub>. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

- Biomass secondary heating

### Primary energy use

The primary energy use for this property per year is 802 kilowatt hours per square metre (kWh/m<sup>2</sup>).

▶ [About primary energy use](#)

### Additional information

Additional information about this property:

- Cavity fill is recommended

## How this affects your energy bills

An average household would need to spend **£3,354 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £2,146 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2025** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

### Heating this property

Estimated energy needed in this property is:

- 20,036 kWh per year for heating

- 1,954 kWh per year for hot water

## Impact on the environment

This property's environmental impact rating is G. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year.

### Carbon emissions

<b>An average household produces</b>	6 tonnes of CO <sub>2</sub>
<b>This property produces</b>	10.0 tonnes of CO <sub>2</sub>
<b>This property's potential production</b>	3.0 tonnes of CO <sub>2</sub>

You could improve this property's CO<sub>2</sub> emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

## Step 1: Room-in-roof insulation

Typical installation cost £1,500 - £2,700

Typical yearly saving £938

Potential rating after completing step 1 **46 E**

## Step 2: Cavity wall insulation

Typical installation cost £500 - £1,500

Typical yearly saving £74

Potential rating after completing steps 1 and 2 **48 E**

## Step 3: Internal or external wall insulation

Typical installation cost £4,000 - £14,000

Typical yearly saving £330

Potential rating after completing steps 1 to 3 **55 D**

## Step 4: Floor insulation (solid floor)

Typical installation cost £4,000 - £6,000

Typical yearly saving £91

Potential rating after completing steps 1 to 4 **57 D**

## Step 5: High heat retention storage heaters

Typical installation cost £2,000 - £3,000

Typical yearly saving £374

Potential rating after completing steps 1 to 5 **65 D**

## Step 6: Solar water heating

Typical installation cost £4,000 - £6,000

Typical yearly saving £125

---

Potential rating after completing steps 1 to 6

68 D

---

## Step 7: Double glazed windows

Replace single glazed windows with low-E double glazed windows

Typical installation cost £3,300 - £6,500

Typical yearly saving £214

---

Potential rating after completing steps 1 to 7

72 C

---

## Step 8: Solar photovoltaic panels, 2.5 kWp

Typical installation cost £3,500 - £5,500

Typical yearly saving £486

---

Potential rating after completing steps 1 to 8

83 B

---

## Advice on making energy saving improvements

- Insulation: [Great British Insulation Scheme](#)
- Heat pumps and biomass boilers: [Boiler Upgrade Scheme](#)
- Help from your energy supplier: [Energy Company Obligation](#)

## Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name Claire Osborne

Telephone 07752098903

Email [claire@zomemedia.co.uk](mailto:claire@zomemedia.co.uk)

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme Elmhurst Energy Systems Ltd

Assessor's ID EES/029320

---

---

Telephone	01455 883 250
